

# PROGRAM OVERVIEW

Ignite is a program designed to provide middle school students with the opportunities to develop a strong work ethic, college and career aspirations, and the soft skills to be successful inside and outside of the classroom. Ignite is for students who stand out in non-traditional ways, like having a strong work ethic and good character, but who could use extra support to reach their full potential. Components of the program include career exploration, college tours, job shadowing, work days, earning and spending their own money, soft skills, and summer camps. Ignite is a cohort-based program that admits students in 6<sup>th</sup> grade and continues through the end of 8<sup>th</sup> grade.

## GET INVOLVED

Contact us to host a field trip, participate in job shadowing, or need volunteers at your business or event!
